

Proseal Australia have recently completed an installation under the guidance and project management of Gilad Sedan of N.A.V.I Co. Global.

Proseal were given the opportunity to supply a major component of what was a multi-component automated production line. The line consisted of high level equipment sourced from around the globe and was specified, sourced and co-ordinated by Gilad.

We found that the whole process, from original line specification discussions through to final install and commissioning, was seamless, very well considered and extremely well managed.

We would be very happy to be involved in future projects under the management of Gilad and N.A.V.I Co. Global.

Best regards,

Scott Templeton  
General Manager
