To Whom in May Concern

Re: Gilad Sadan – N.A.V.I.

I worked with Gilad Sadan on a unique automation project recently. Gilad worked on behalf of the client as a marketing consultant, however his role was more comprehensive as he also managed the entire project. Gilad called quotes from various equipment manufacturers, selected the successful bidders after evaluation, arranging and coordinating trades to provide power and air to the various pieces of equipment Unloaded containers and Positioned the equipment in the proposed layout. Everything was handled in a professional and controlled manner.

Given the fact the location was a remote rural installation, the installation went exceptionally well. Our experience in these situations is often parts and engineering services are difficult to obtain. Between the customer and Gilad, these services were preorganised along with accommodation, which made our job a lot easier. All equipment suppliers worked very well together and the installation was a success.

I would like to recommend Gilad in both his Marketing and Project Management Roles as he is a professional and extremely well organised individual and we look forward to working with him in the future.

Kind Regards

Impact Automation Solutions

Marty Rodgers

Managing Director
